SUMMARY

Frontend-focused Software Engineer with 3+ years shipping UI-heavy features for B2B SaaS products in JavaScript (ES6+), TypeScript, HTML5 and CSS3. Builds reusable component libraries and responsive interfaces with React.js, Next.js and Redux, owns front-end build and test tooling (Vite, Webpack, Babel, CI/CD), and integrates REST, GraphQL, WebSocket and Webhook services backed by Node.js. Translates UI/UX designs and wireframes into production code and optimises rendering performance at scale.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Dart, Python, Go, C++

Frontend: React.js, Next.js, Redux, Tailwind CSS, ShadCN, Bootstrap, jQuery, Flutter, Responsive UI, Reusable Component Libraries, Cross-Browser Compatibility, UI Performance Optimization

Build & Test: Vite, Webpack, Babel, Next.js Build Configuration, npm, Selenium (Automated UI Testing), Git, GitHub Actions, CI/CD

Web Services & APIs: REST, GraphQL, WebSockets, Webhooks, JSON, API Design & Integration

Backend: Node.js, Express.js, FastAPI, Flask, Django, Gin, PostgreSQL, MySQL, MongoDB, Firebase

Cloud & DevOps: AWS (EC2, S3, API Gateway, Amplify, CloudFront, Route 53), Azure (VMs, Blob Storage, Functions), Docker, Vercel

Tools: Postman, Figma, Apache

EXPERIENCE

RUNO — Software Development Engineer I

Aug 2024 – Present · Hyderabad, India

- Delivered a B2B SaaS Call CRM used by 10k+ daily active agents by owning key UI modules across web and mobile, building a reusable component library on a single cross-platform codebase to keep interface behaviour consistent on both surfaces.
- Shipped 15+ customer-facing features to production by translating UI/UX designs and wireframes into tested components and defining REST API contracts up front with backend and DevOps engineers, cutting cross-team integration rework by 40%.
- Reduced production incident mean-time-to-resolution by 60% by instrumenting client-side error and latency monitoring across the call pipeline (structured logging, error-rate metrics, threshold alerting) and acting as first responder during on-call rotations.

R3Factory — Software Developer Intern

Feb 2024 – Aug 2024 · Remote

- Lifted customer engagement 30% on an AI-powered e-commerce platform by architecting a component-driven React.js storefront with responsive HTML5/CSS3 layouts, wired to a RASA NLP intent-resolution service handling 200+ queries/day.
- Increased data-ingestion throughput by 30% while sustaining 10,000+ product records weekly from 5+ sources, by parallelising extraction with a multi-threaded worker pool and holding failure rate under 5% through header and proxy rotation with exponential-backoff retries.

Otomator Technologies — Full Stack Developer

Aug 2021 – Oct 2023

- Eliminated 70+ hours/month of manual HR processing for 1200+ employees by building a MERN attendance and leave-management interface, automating record reconciliation and multi-step approval workflows.
- Sustained 99.9% availability for an IoT control application managing 50+ connected devices, by building the Node.js service layer with webhook-secured device-to-app messaging and real-time state sync to the client.

PROJECTS

XEV Charging — Next.js, TypeScript, Flutter, Go, AWS

Dec 2023

- Shipped a production EV-charging platform for a U.S. client by leading 5 frontend, backend and mobile engineers and owning the Next.js web application, its shared component layer and the API contracts between web, mobile and station services.
- Delivered real-time station status to 100+ charge points at 2-10ms update latency by consuming WebSocket and REST services from the client, backed by stateless Go microservices serving 1k+ requests/min.
- Reduced release cycle time by owning the front-end build pipeline - bundling and multi-environment deploys automated with GitHub Actions and CI/CD on AWS Amplify.

Finaccru - Accounting Platform — React.js, Redux, FastAPI, MySQL

Feb 2024

- Cut invoice data-entry time by 70% for accounting teams by building a React.js document-review interface over an OCR extraction service, handling 500+ documents/day at 90% field-level accuracy.
- Enabled real-time collaboration for 100+ concurrent users by implementing a WebSocket chat layer with role-based views for clients, accountants and admins.

EDUCATION

Kurukshetra University — B.Tech, CS (AI & ML) · GPA 8.66 / 10

Oct 2020 – Jun 2024

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, Computer Networks, Operating Systems, Advanced Machine Learning.
