

RISHABH VARSHNEY

Software Engineer -- AI/ML, Backend Architectures, Full-Stack Systems
Hyderabad, India | Remote | GitHub: github.com/var-rishabh

SUMMARY

Software engineer specializing in AI/ML systems, backend architecture, and full-stack product development. Experience building high-throughput streaming pipelines, transformer-based NLP systems, and production-grade web platforms.

SELECTED PROJECTS

CareerForge AI

Intelligent ATS resume alignment engine paired with an interactive 3D portfolio workspace. Built with Next.js, Three.js, Claude MCP, and Tailwind CSS.

High-Throughput Streaming & Backend Pipelines

NVR streaming and microservice pipelines built with Node.js and Python, featuring optimized socket streaming and low-latency media processing.

Research & AI Summarization Engine

Transformer-based NLP pipeline for automatic text summarization; research presented at the ICCIMA conference.

TECHNICAL SKILLS

Languages & Backend: Python, TypeScript, Node.js, C++, SQL, REST, gRPC

AI/ML & Data: PyTorch, NLP Summarization, Machine Learning Pipelines

Cloud & Infra: Docker, Git, CI/CD, Linux, Scalable System Architecture

STATUS

Available for impactful roles. Location: Hyderabad / Remote.
