

RISHABH VARSHNEY

Systems & AI Engineer -- AI/ML, Backend Systems, Full-Stack

Hyderabad, India / Remote | right.rishabh@gmail.com

github.com/var-rishabh | linkedin.com/in/rishabh-builds

SUMMARY

Full-stack, backend and AI/ML engineer building the machinery behind products:

LLM-powered applications, NLP research, real-time streaming backends and microservice platforms.

AI / ML

CareerForge AI

AI career ecosystem: ATS-style resume analysis, alignment to target roles and rewriting, with LLM tool orchestration over Claude MCP and an interactive 3D workspace. Next.js, Claude MCP, Three.js, Tailwind CSS.

Text Summarization Research -- ICCIMA

Research into extractive and abstractive text summarization algorithms, presented at ICCIMA. Python, PyTorch, Transformers, NLP.

BACKEND SYSTEMS

NVR Streaming

Network video recorder streaming: concurrent camera feeds ingested and served over tuned socket pipelines for low latency. Node.js, Python, Sockets.

Twilio Integrations

Programmable SMS and voice wired into backend workflows: event-driven notifications and verification over webhooks. Twilio, Node.js, REST.

Washee Backend

Service layer for the Washee platform: independently deployable microservices with clean API boundaries. Node.js, Microservices, REST APIs, Docker.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, Java, Dart, SQL

Backend & Web: Node.js, Express, Next.js, React, Redux, REST, WebSockets

AI/ML: PyTorch, Transformers, NLP, LLM tooling (Claude MCP)

Data & Infra: MongoDB, MySQL, Firebase, Docker, Git, Vercel

STATUS

Available for impactful roles. Location: Hyderabad / Remote.
